

**TOYOTA  
LAND CRUISER 300**

## MORE POWER

Toyota's Land Cruiser began with the **TOYOTA JEEP BJ SERIES** in 1951 and by 2019, the global total sales volume reached 10 million units. In 2021 we celebrate the 70th anniversary of the Land Cruiser series.

The Land Cruiser is a vehicle built for every road and to suit every person's life. These vehicles are built to carry anything you need to any part of the world no matter how remote or how tough the roads.

This high level of reliability is the reason why this model has been part of so many families and businesses and will continue to be part of our lives for years to come.

# A STORY OF INHERITANCE SINCE 1951

**THE KING OF 4X4**

## CONQUER THE CITY WITH ELEGANCE AND STYLE

The resolute design is solidified by a strong grille and high gloss 20" alloy wheels that culminate in a bold and elegant presence. Take control.

## AN INTERIOR THAT IS BOTH COMFORTABLE AND CONVENIENT

**Palatial comfort and practical convenience: why choose when you can have both?**

Elegant and cosy with quality materials, the new Land Cruiser provides extra convenience thanks to its versatile seat configurations. Travel in style and luxury with up to 7 passengers and all of their luggage.

### SEATING CONFIGURATION OPTIONS

All seats can be flexibly arranged for a wide range of seating and luggage hold options.

### REAR AIR CONDITIONING

An automatic rear air conditioner helps enhance rear passenger comfort.

### LUGGAGE ROOM

A switch allows you to automatically stow the third row seats (electric control only, grade dependent) under the floor to create ample storage room.

Toyota has developed a new GA-F platform based on the Toyota New Global Architecture (TNGA). Newly developed turbocharged V6 engines include gasoline and diesel variants, both offering greatly improved power, torque and efficiency from a smaller displacement compared to the current model. A 200kg weight reduction was achieved across the entire vehicle as a result of this initiative to help in fuel efficiency.

**Engine 3.3 Diesel F33A-FTV Engine (10 speed Automatic)**

Power Max output 306 hp (225 kW) / 4000 rpm  
Torque Max torque 700 Nm / 1600-2600 rpm

**Engine 3.5 Petrol V35A-FTS Engine (10 speed Automatic)**

Power Max output 415 hp (305 kW) / 5200 rpm  
Torque Max torque 650 Nm / 2000-3600 rpm

# EXCEPTIONAL POWER

**V6 3.3 LITRE DIESEL ENGINE WITH 10 SPEED AUTOMATIC TRANSMISSION**

The new 3.3 litre Twin Turbo Diesel Engine features smarter and more efficient technology with seamless shifts between single and dual turbo use as well as increased performance.

This engine aims to enhance environmental friendliness, fuel efficiency, driving performance, durability, quietness, and ground-covering performance on rough roads. The rotating and reciprocating parts have been made suitable to enhance fuel efficiency, driving performance, durability and cabin comfort. The exhaust and turbocharging systems too, have been revised to enhance smooth acceleration, driving performance, durability, and environmental friendliness.

**NEW 10-SPEED TRANSMISSION**

Newly developed AJAOF 10-speed automatic transmission available standard on both engines enhance driving performance, fuel efficiency, and quietness.

- A newly developed torque converter and high precision lock-up slip control achieve excellent fuel efficiency and smooth acceleration feel matching driver's intensions.
- Cross-over gear ratios, component optimization, and precise high-response control achieve an excellent shifting feel and exhilarating rhythmic gear shift feel.
- The structure and control of the transmission aiming for utilizing a highly efficiency range of the engine reduce slip loss of the torque converter and enhance transmission efficiency.

# 4WD UPGRADE TO THE TOP

ADVANCED TECHNOLOGY FEATURES FOR  
EXCEPTIONAL DRIVING PERFORMANCE

## MULTI-TERRAIN SELECT WITH AUTO MODE

Multi-Terrain Select is a revolutionary system that enables you to drive over all kinds of road surfaces. When the transfer range is in H4 or in L4, the system selects respectively from five and four different modes to address the road surface and provide optimal traction.

In addition, by selecting AUTO mode, the vehicle estimates the current driving surface based on information from various sensors to optimise driving force and suspension control. The driver does not need to change the driving mode to get the best off-road performance.

## MULTI-TERRAIN MONITOR

With four cameras installed on the front, sides and rear of the vehicle, the system provides off-road driving support by capturing the road conditions around the vehicle, which are often in the driver's blind spots.

The center display shows the front, rear, left and right of the vehicle, as well as an image featuring guidelines of the view directly underneath the vehicle as if the floor were transparent. In addition, a panoramic view will display an image of the vehicle from above.

- A Front view
- B Side view (left & right)
- C Back view
- D Panoramic view
- E Underfloor view

# FEEL THE POWER

## ELECTRONIC KINETIC DYNAMIC SUSPENSION SYSTEM

The newly developed E-KDSS detects road surface conditions, vehicle speed, and steering operation. It automatically and independently locks or frees the front and rear stabilizers. The system performs detailed control according to the detected cornering and road surface conditions. Thus, it enhances off-road driving performance, ride comfort as well as on-road handling stability.

## FRONT DIFFERENTIAL LOCK

In addition to the rear differential lock, there is a new front differential lock. Even on rough roads, when one wheel is lifted off the ground, the system distributes driving force optimally to the grounded tire. This improves escape performance and provides excellent rough-road driving performance.

## AVS: ADAPTIVE VARIABLE SUSPENSION

Adaptive Variable Suspension System with linear solenoid type enhances ride comfort and driving performance on rough roads. The system adjust damping force according to road conditions from small irregularities to large bumps and dips. Thus, it contributes to enhancing ride comfort, handling stability and ground covering performance on rough roads.

## CRAWL CONTROL

Crawl Control helps provide optimal throttle and brake control maintaining a constant low speed. It supports a safe and sure driving on sand, dirt, rock, snow, mud, steep grades, or other surfaces that require fine accelerator control. Five speeds are offered with fully automatic throttle and brake control. It helps you concentrate on steering the vehicle.

## TURN ASSIST FUNCTION

Turn Assist helps to turn the vehicle in response to the driver's steering, while maintaining a consistently low speed, even in tight corners, which would normally be difficult to pass without a turnaround maneuver.

40 NATURAL BEIGE

Connect your smartphone thanks to Apple CarPlay or AndroidAuto on the 12,3" screen to take the road safely while enjoying your own music with 14 JBL speakers.

**PROGRESSION OF LUXURY**

30/31 BLACK & DARK RED

20/21 BLACK

# ADVANCED SAFETY TECHNOLOGIES

## ABS: ANTI-LOCK BRAKE SYSTEM

ABS operates by preventing the wheels from locking up during intensive braking. It thereby maintains tractive contact with the road surface. Thus, it allows the driver to maintain more control over the vehicle.

## VSC: VEHICLE STABILITY CONTROL

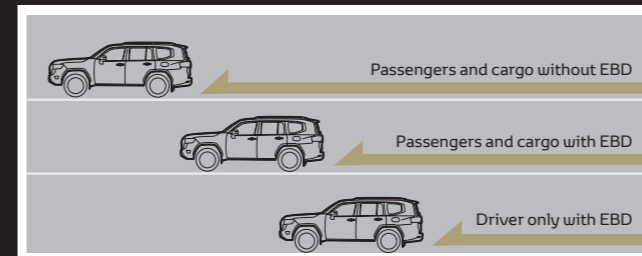

It automatically activates each individual brake as needed and controls engine output to help maintain stability. It also prevents skidding when turning sharply or cornering on slippery road surfaces.

# MORE SAFETY FEATURES

## AIRBAGS (SRS)

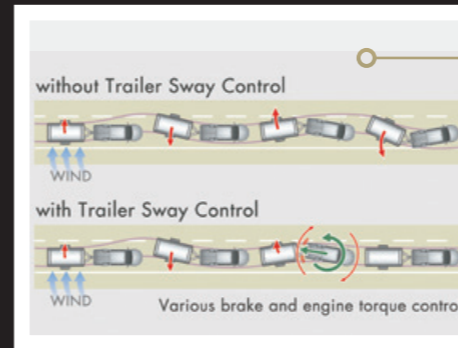

Front and knee airbags for the driver and front-seat passenger, side airbags for first and second rows, and curtain-shield airbags for all three rows support passenger safely in the event of a collision.

\*Availability of airbags differs depending on vehicle specifications.

## EBD: ELECTRONIC BRAKE FORCE DISTRIBUTION

Even when there is a difference in front/rear or left/right wheel load, EBD controls brake force on each wheel appropriately and helps to shorten stopping distance. The EBD controls the braking force on the wheels, based on the total number of the occupants, load conditions and during deceleration and cornering. Thus, it offers excellent brake control.

## TSC: TRAILER SWAY CONTROL

It suppresses any trailer sway caused by wind, bumpy roads or steering whenever you are towing. With sensors detecting yaw, acceleration and steering, TSC uses deceleration control and yaw moment to limit sway. The stop lamps are illuminated to warn drivers behind.

## PARKING SUPPORT SYSTEMS

Parking support brake system provides driving force suppression and brake control for situations when there is a risk of collision. Whether it is with obstacles in front or behind the vehicle or when driving at low speeds, such as when parking, it activates.

# COMPLETE PEACE OF MIND WITH TOYOTA.

## Toyota Quality Service

Your Toyota dealership will advise you on your vehicle's service requirements. It will need a health and safety check at least once a year. An intermediate check is necessary every year or 5,000km.

## Toyota Low Maintenance Costs

All Toyota vehicles are designed and engineered to minimize your maintenance costs. This includes fewer parts that require servicing and, equally important, is that Toyota vehicle technology is made accessible so that maintenance labor time is reduced and pricing is competitive.

## Toyota Genuine Parts

Providing the reassurance of Toyota quality, only genuine and approved components are used on your vehicle. If the vehicle is damaged, its design helps minimize the cost of repair because the most expensive-to-replace parts are deliberately located away from common damage zones. The result is less expense for parts and labor.

## Toyota Accessories

Toyota genuine accessories are designed and manufactured with the same care, quality and attention to detail as Toyota vehicles. Adding a touch of style, comfort, convenience and practicality, they are tested for exceptional durability to enhance the enjoyment of your new vehicle. All accessories are covered by a 1-year warranty.

## Toyota Comprehensive Warranty

Every new Toyota comes with a 3 years or 100,000km vehicle warranty, which covers any defect caused by a manufacturing fault. Transport to the nearest authorized Toyota repairer will also be covered\*. In addition, a 3 years or 100,000km paint warranty protects against defects and surface rust caused by a manufacturing fault (except load bins which are covered for 1 year.) Every

Toyota commercial vehicle is covered by a 3 years unlimited mileage corrosion-perforation warranty\* against corrosion of body panels caused by a manufacturing fault in materials or workmanship.

## Toyota Added Security

Toyota's comprehensive security system withstands the insurance industry's rigorous five-minute attack test. The alarm system and immobilizer are approved by major insurance companies.

\*Check with your dealership for specific warranty details.
